

Great Australian Bight Project

Ceduna Sub-Basin

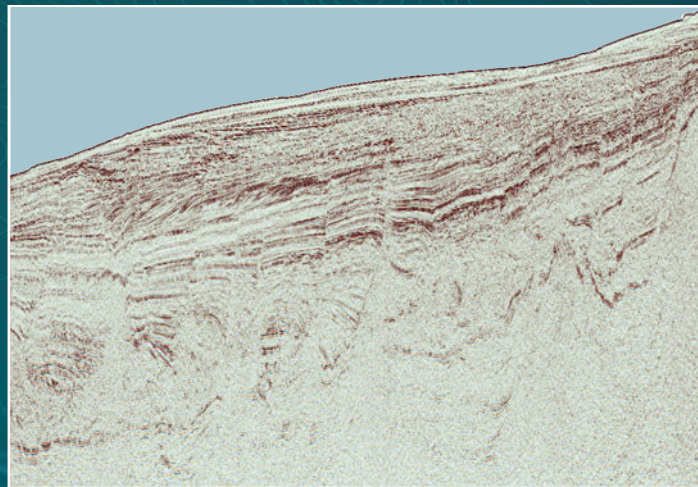

PSTM Reprocessed 2D Seismic Data

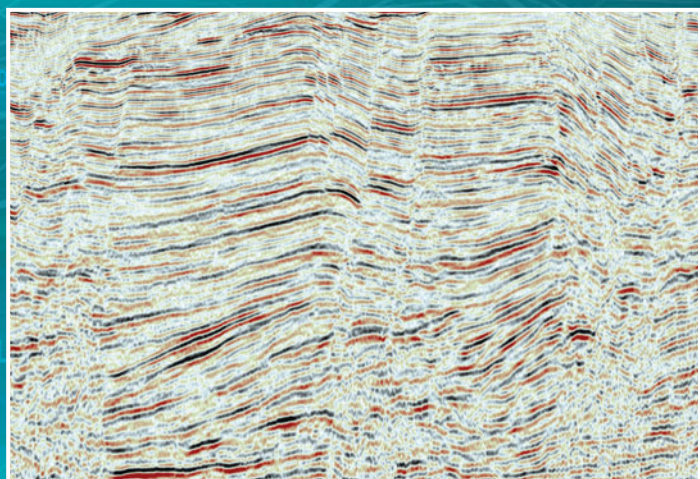

Geoscience Australia have recently published results from a geological sampling study, with promising evidence for a world class Cretaceous source rock in the Ceduna Sub-Basin.

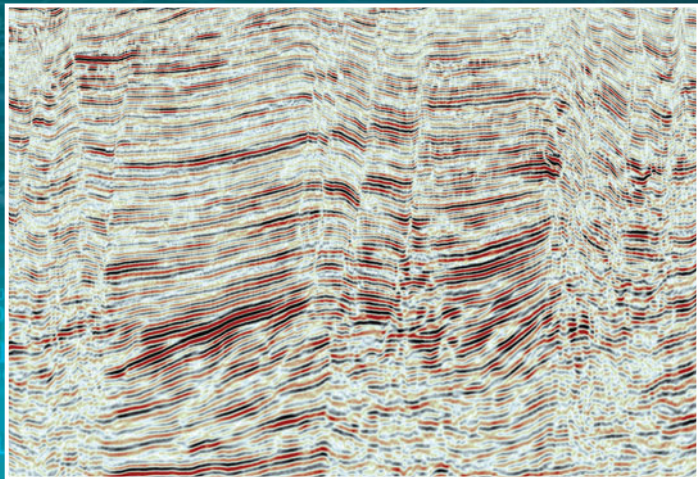

Before: Flinders Open File Seismic

After: Flinders PSTM Reprocessed Seismic

Before: Deep Water GAB Open File Data

After: Deep Water GAB PSTM Reprocessed Data

Gathers, Angle Stacks and AVO only available with the PSTM Reprocessed data sets
(not available with open file data)
